

Description

Function «Impact reports» - The impact analysis report does not take into account data which are defined with the OCCURS option.

Here is the definition of the following variables in the WSS :

```

130 012800 10  TABLE-CLES-VALEUR PIC X(30).          01280000
131 012900*
```

When Impact Analysis is performed on the 'TABLE-CLES-VALEUR' variable : the report is only able to identify and to analyse the variable 'TABLE-CLES-VAL-TYREFER' within TABLE-CLES which is the very first occurs of the TABLE-CLES-VALEUR.

A similar Impact analysis should be produced in this report for these 4 variables which are redefined by TABLE-CLES-VALEUR.
